BestFXsignal.com managed account program is currently available via FXDD.

About FXDD.com

FXDD.com developed FX Manager as a solution for both money managers and clients. This tool allows you to monitor your investments with any manager. You can track your account 24/7, for balance, equity, statements, transactions, and fees, all in real time.

You can deposit money by Wire, Electronic check or PayPal. Withdraws are executed the same way deposits were made, and only to the account or person from which it was funded. This means that you are the only possible recipient of a fund withdraw.

Clients control their own accounts at all times, and can withdraw any amount at any given time.

You have to put on an authorisation (POA, Power of Attorney) towards FXDD, in which you empower the Bestfxsignal (firm) to manage your account. You may annul this authorization at any time.

How can you secure your money?

You will start your own account with a broker, and then provide us with the platform, login, password and a power of attorney to trade on this account. Due to this solution no funds will be transferred on our accounts, but will be transfer from your account to the broker. This means that you will have constant access to your funds and you will be the only person that will have a power to withdraw them. In this case you do not have to trust us with your money.

What is the minimum deposit for managed account?

The minimum amount that we agree to manage is 10.000 USD and you can withdraw this money at any time from the brokerage account.

How do Bestfxsignal get paid?

Bestfxsignal only get paid a commission from profits. There are no entry fees, nor any other regular fees. We only earn money if you earn money, which means we will do our best to earn money for you, because this is the only scenario in which we make money for ourself. We get paid a commission of 30% on all profits from funds. We get paid once every months.

Fees

Management Fee: 0%.

Transaction Fee: 0%.

Performance Fee: 30% based on the High Watermark methodology. Collected on the monthly basis.

The high-water mark ensures that the manager does not get paid large sums for poor performance. So if the manager loses money over a period, he or she must get the fund above the high watermark before receiving a performance bonus. For example, say after reaching its peak a fund loses \$100,000 in year one, and then makes \$250,000 in year two. The manager therefore not only reached the high water mark but exceeded it by \$150,000 (\$250,000 - \$100,000), which is the amount on which the manager gets paid the bonus. Fxddd every months charge 30 % fees from your account for us. Fxddd don't charge other fees from your account.

What is the maximal drawdown?

Maximal drawdown 8-10 %.

You may wish to risk only 20% of your investment, or 50% or even a 100%. It means that for example when you put 10.000\$ and you are willing to risk 20%, than once the account balance hits 8.000\$ all the trades will be closed and we will stop trading and you will be Managed funds free to take out 8.000\$. We advice our customers to have this limit at 40-50%. Forex market is very volatile and it can happen that account balance can change 20% in one day up against you, and than go 30% in your favour. This means the customers with small risk willingness would loose money, and those with higher one, would made money.

Performance

To receive the detailed performance report, please [contact](#) us.

Our managed account program details:

Our clients control their own accounts at all times, and can withdraw any amount at any given time. Accounts can be tracked 24/7, for balance, equity, statements, transactions and fees, all in real time with reading password.

We are working on the forex market since 3 years, but in the first 2 we just build out our strategy and make a lot of testing. Since 1 year our clients can get the signals also. So, we work with 3 strategies one of them is real fundamental (long term trades), the other 2 are grounded on technical analysis, so in this way we can use the 100% of forex market, we are always ready to manage our positions, as the market change.

Our money management is relatively conservative, our clients planning with a longer term with us, we also manage smaller deposits, from 10.000 \$ standard account.

Usually we make risk on the 3-5 % of the fund in 1 trade. Profit -Loss Trades % : generally 80-20%.

The lot size depends on the SL, and strategy, for example 10.000 amount - lot size is 0.1-0.2.
SL usually 30-50-150 pips, depends on the strategy. Maximal drawdown 8-10 %.

If you don't have Fxddd account:

1. Open **FXDD** account, with minimum 10.000 USD deposit, www.fxddd.com
2. Fill out the Power of Attorney. If you are ready, please, scan this POA, and compensation acknowledgement, and send us (via e-mail: account@bestfxsignal.com)
or Fax: 003618088211
3. Then we sign up also and we send it to the FXDD.
